About me

As a seasoned Solutions Architect and JavaScript enthusiast, I excel in designing robust, scalable solutions and leading teams to successful project completions. My quick learning abilities and excellent communication skills foster efficient collaboration within diverse work environments. Challenges drive me and my leadership skills help me drive innovation. Outside of work, I draw inspiration from being a devoted father to my beloved daughter, Nikol Daniela. 🥰

Work Experience

Cloud Solutions Architect Lead, Rena Ware

12/2023 - present

Bucaramanga,
Colombia

- Cloud Infrastructure Migration: Led the migration of on-premise databases and applications to Azure, optimizing performance and reducing costs.
- Cloud Cost Optimization: Analyzed and adjusted resource consumption in Azure, achieving cost reductions without impacting operations.
- Automation and Architectural Process Improvement: Created the Express Architecture meta-model to streamline architectural documentation and add business value, implementing it in three countries.
- Technical Leadership and Digital Transformation: Led the company's digital transformation, engaging with leaders and key stakeholders across the seven countries where the company operates.
